Thank you for choosing our remote control car. Before you use it, please read these instructions carefully. Please keep this manual for future reference.

Vielen Dank, dass Sie sich für unser ferngesteuertes Auto entschieden haben. Um korrekt und zufriedenstellend zu spielen, lesen Sie bitte diese Anleitung sorgfältig durch und bewahren Sie sie für zukünftige Anwendung auf.

### Safety and Cautions

Do not operate the car on highways, crowded places or near airports. It may cause traffic accidents.

Never run the RC car in crowded areas or toward people or animals.

Never run the RC car near rivers, ponds or lakes. To avoid the RC car falling into the water.

Before playing, turn on the remote control first, and then turn on the remote control car.

Do not touch high-speed rotating tires.

Do not drive the RC car in the rain, the rain may cause damage to the car.

The motor and battery will be very hot after running, please do not touch.

Remove the batteries when not using the RC car and remote control for a long time.

Please do not turn on two remote-controlled cars or controllers with the same frequency simultaneously. In such circumstances, wait until the frequency of one car is adjusted before starting to turn the frequency of the other one.

\*Please do not turn on two RC-Autos in the rain, the rain may cause damage to the car.

\*Bitte schalten Sie nicht gleichzeitig zwei ferngesteuerte Autos oder Controller mit der gleichen Frequenz ein. Unter solchen Umständen warten Sie, bis die Frequenz eines Autos eingestellt ist, bevor Sie beginnen, die Frequenz des anderen einzustellen.

Die Spitze der Antenne kann gefährlich sein, bitte richten Sie sie nicht auf das Gesicht.

Die Spitze der Antenne kann gefährlich sein, bitte richten Sie sie nicht auf das Gesicht.

Während und nach dem Betrieb wird der Motor heiß sein. Bitte berühren Sie ihn nicht, bis er abgekühlt ist.

Bitte installieren und verwenden Sie gemäß dieser Anweisungen.

Das Produkt enthält kleine und scharfe Teile, die ein Risiko des Verschluckens oder Erstickens darstellen können.

Do not operate in water, rain, or humid environments as it may cause damage to the remote control car components.

Regularly check the charger, wires, plugs, and other components. If any damage is found, stop using until it is repaired.

To maintain the normal lifespan of the battery, please use the charger, battery case, and battery that come with this product.

**Warnungen**

Bitte installieren und verwenden Sie gemäß dieser Anweisungen.

Das Produkt enthält Kleinteile, die ein Risiko des Verschluckens oder Erstickens darstellen können.

Betreiben Sie es nicht in Wasser, Regen oder feuchter Umgebung, da dies zu Schäden an den Komponenten des ferngesteuerten Autos führen kann.

Überprüfen Sie regelmäßig das Ladegerät, die Kabel, Stecker und andere Komponenten. Wenn Schäden festgestellt werden, hören Sie auf, es zu verwenden, bis es repariert ist.

Um die normale Lebensdauer der Batterie zu gewährleisten, verwenden Sie bitte das mitgelieferte Ladegerät, den Batteriekasten und die Batterie für dieses Produkt.

### Troubleshooting

Description	Cause	Solution
The car does not operate at all.	Remote control or rc car is off Batteries are not installed properly in the remote control	Turn on both remote control and rc car Place batteries properly.
The car does not follow your operation.	Beyond the range of the remote control. The battery power of the remote-controlled car or remote control has run out.	Keep the remote control car within the specified distance. Replace the batteries with new ones or charge the battery.

### Remote Control Operating Instructions

As illustrated, when the steering control wheel is turned, the car will veer to the left. The degree of the car's turn is determined by the extent of the rotation of the steering control wheel.

Wie dargestellt, wird das Auto nach links abbiegen, wenn das Lenkrad gedreht wird. Das Ausmaß der Kurve des Autos wird durch das Ausmaß der Drehung des Lenkrads bestimmt.

As illustrated, when the steering control wheel is turned, the car will veer to the right. The degree of the car's turn is determined by the extent of the rotation of the steering control wheel.

Wie dargestellt, wird das Auto nach rechts abbiegen, wenn das Lenkrad gedreht wird. Der Grad der Kurve des Autos wird durch das Ausmaß der Drehung des Lenkrads bestimmt.

As illustrated, pull the trigger backwards and the vehicle will move forward. The extent to which the trigger is pulled can control the speed of the vehicle's advancement.

Wie dargestellt, ziehen Sie den Auslöser rückwärts und das Fahrzeug wird vorwärts bewegt. Das Ausmaß, in dem der Auslöser gezogen wird, kann die Geschwindigkeit des Fortschritts des Fahrzeugs steuern.

When braking, you need to release the trigger to let it return to its position. As the trigger is pushed forward, the car will move backward. The extent to which the trigger is pushed forward can control the speed of which the car retreats. For safe play and to simulate the actual process of car driving, the backward speed of the remote control car is 50% of the forward speed, which may cause it to be unable to move backward when the remote control car's speed is very slow. At this time, you need to adjust the throttle speed and increase the speed of the remote control car so that it can move backward.

Beim Bremsen müssen Sie den Auslöser loslassen, damit er in seine Position zurückkehren kann. Wenn der Auslöser nach vorne gedrückt wird, fährt das Auto rückwärts. Das Ausmaß, in dem der Auslöser nach vorne gedrückt wird, kann die Geschwindigkeit steuern, mit der das Auto zurückfährt. Für sicheres Spielen und zur Simulation des tatsächlichen Autofahrprozesses beträgt die Rückwärtsgeschwindigkeit des ferngesteuerten Autos 50% der Vorwärtsgeschwindigkeit, was dazu führen kann, dass es bei sehr geringer Geschwindigkeit des ferngesteuerten Autos nicht rückwärts fahren kann. In diesem Fall müssen Sie die Gasgeschwindigkeit anpassen und die Geschwindigkeit des ferngesteuerten Autos erhöhen, damit es rückwärts fahren kann.

### Remote Control Functions

Power LED Leuchtdiode  
Power switch Ein-/Ausschalter  
Steering Wheel (Left/Right) Lenkrad (Links/Rechts)  
Fine-tuning the direction Feinabstimmung der Richtung  
Fine-tuning the throttle Feinabstimmung des Gashebels  
Trigger(Foward/Backward) Auslöser(Vorwärts/Rückwärts)

### Operation Method

- Switch on the power button ➊ on the remote control and ensure the power indicator light ➋ flashes red, then turn on the power switch of the remote-controlled car.
- Gently pull the throttle trigger ➌ on the remote control and observe whether the remote-controlled car can move forwards and backwards.
- Turn the remote control's steering wheel ➍ to the left or right to ensure the remote-controlled car can steer correctly.
- Lightly hold the throttle trigger ➌ of the remote control. If the car cannot go straight, twist the trim knob ➎ for direction multiple times and test, until the remote-controlled car can go straight normally.
- The throttle speed adjustment ➏ can control the speed of the remote-controlled car. Turning it to the right makes the car go faster, while turning it to the left slows it down.

### Remote Control Car Maintenance

When not using the remote control car for a long period of time, please remove the batteries from the vehicle.

Wenn Sie das ferngesteuerte Auto längere Zeit nicht benutzen, entfernen Sie bitte die Batterien aus dem Fahrzeug.

Apply rust-proof oil to any exposed metal parts. (This product does not include rust-proof oil.)

Wenn das produkt qualitätsprobleme aufweist oder sie fragen oder bedenken haben, kontaktieren sie uns bitte. Wir helfen Ihnen gerne weiter. Kontakt: service@sunsurp.com
