CARE ADVICE:

Ceramic is a very hard material but is not unbreakable. Hard shocks and heavy objects can damage the surface. We recommend you use a soft sponge or cloth that does not scratch with soapy water (vegetable oil soap or translucent washing-up liquid). If you want to use a cleaning product, it is better to use a common general household product. Do not use aggressive abrasive or chemical products (hydrofluoric acid, anti-rust type products, etc.). The guarantee applies under normal conditions of use.

DE

PFLEGEHINWEISE:

Keramik ist ein sehr hartes Material, aber nicht unzerbrechlich. Starke Stöße und schwere Gegenstände können die Oberfläche beschädigen. Es wird empfohlen, mit einem kratzfreien Schwamm oder einem in Seifenwasser getauchten Lappen (Marseiller Seife oder durchsichtiges Pilates-Reinigungsmittel) zu wischen. Wenn ein Reinigungsmittel verwendet werden soll, verwenden Sie am besten ein Allzweck-Fleckenentfernungsmittel. Verwenden Sie keine scheuernden oder ätzenden chemischen Produkte (Flusssäure, Rostschutzmittel,) . Die Garantie gilt für den normalen Gebrauch.

FR

CONSEILS D'ENTRETIEN:

La céramique est un matériau très dur mais pas incassable. Les chocs importants, les objets lourds peuvent endommager la superficie. Nous vous conseillons d'utiliser une éponge ou un chiffon ne grattant pas avec de l'eau savonneuse (Savon de Marseille ou liquide vaisselle translucide). Si vous souhaitez utiliser un produit d'entretien, le mieux est de prendre un produit domestique courant universel. Ne pas utiliser de produits abrasifs ou chimiques agressifs (acide fluorhydrique, produits type antirouille...). La garantie s'applique dans des conditions normales d'utilisation.

IT

CONSIGLI DI MANUTENZIONE:

La ceramica è un materiale molto duro ma non infrangibile. I gravi urti e gli oggetti pesanti possono danneggiare la superficie. Si consiglia di utilizzare una spugna o un panno che non graffia, con acqua e sapone (Sapone di Marsiglia o detersivo piatti traslucido). Se si desidera utilizzare un prodotto per la pulizia, è meglio usare un prodotto domestico comune universale. Non usare prodotti abrasivi o chimici aggressivi (acido fluoridrico, prodotti del tipo antiruggine,....). La garanzia è applicabile in condizioni di normale utilizzo.

ES

CONSEJOS DE MANTENIMIENTO:

La cerámica es un material muy duro, pero no irrompible. Los impactos fuertes y los objetos pesados pueden dañar la superficie. Recomendamos el uso de una esponja o un paño que no arane, con agua jabonosa (abón de Marsella o líquido lavavajill as traslúcido). Si se desea utilizar un producto de limpieza, lo mejor es un producto de uso doméstico general. No se deben utilizar productos abrasivos ni químicos agresivos (como ácido fluorhídrico, productos para eliminar el óxido, etc.). La garantía cubre un uso normal del producto.
