## 8. Dacheindeckung / Roofing / Toiture / Dakbedekking

	<p><b>UH2/12</b>  3mm</p> <p>+</p> <p><b>C105-0040</b>  40mm</p> <p>Die Dachbretter werden mit je <u>zwei Schrauben pro Sparren verschraubt.</u> Les panneaux de toit sont vissés ensemble avec deux vis par chevron. The roof boards are screwed together with two screws per rafter.</p>
--	--

**Die Dachbretter werden vorgeschritten geliefert und müssen beim weiteren Verlegen ggf. gekürzt werden. Durch Ausrichten der Winkelschnitte der unteren Reihe auf Sparrenmitte ergibt sich der Dachüberstand.**

The roof boards are delivered pre-cut and must be shortened if necessary. By aligning the angle sections of the lower row on the center of the rafter, the roof overhang results.

Les panneaux de toit sont livrés pré-coupés et doivent être raccourcis si nécessaire. En alignant les sections angulaires de la rangée inférieure au centre du chevron, le surplomb du toit résulte.

	<p><b>UH2/8</b>  3mm</p> <p>+</p> <p><b>C105-0040</b>  40mm</p>
