A horizontal sequence of three black triangles pointing to the right. Each triangle contains a white circle with a black number: '1' in the first, '2' in the second, and '3' in the third. A thin black arrow points from the center of the first triangle to the center of the second, and another from the center of the second to the center of the third.

2x	
Nr.526	

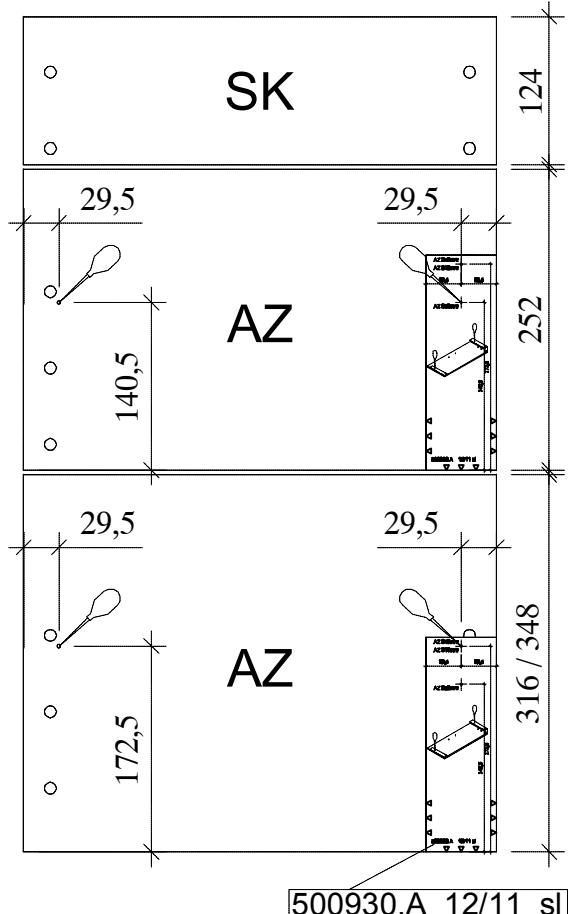

4x	
4 x 20	

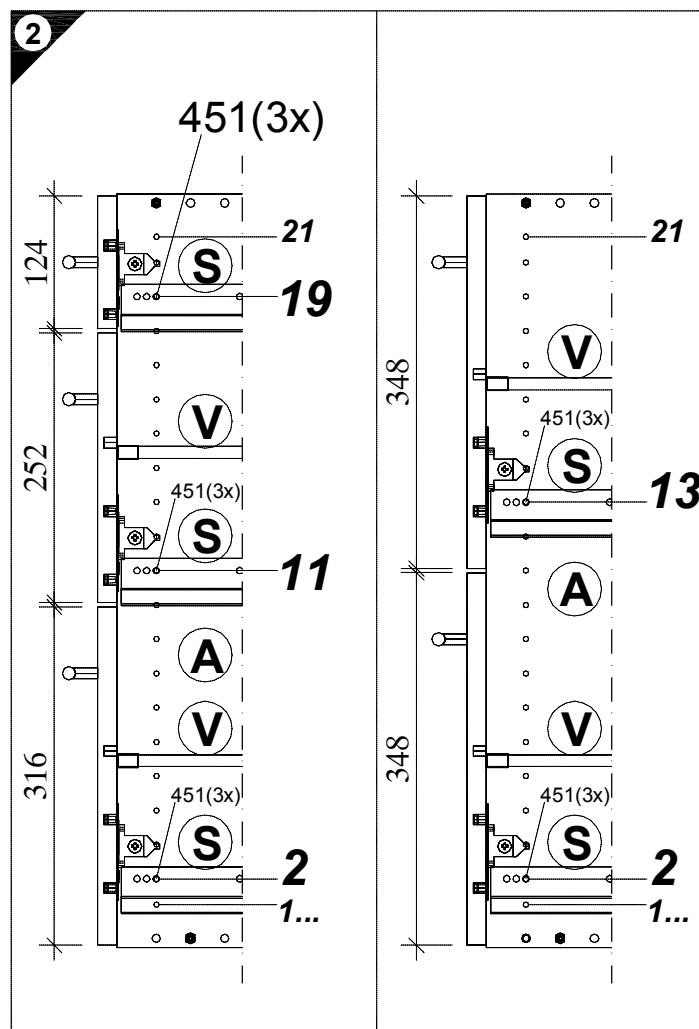

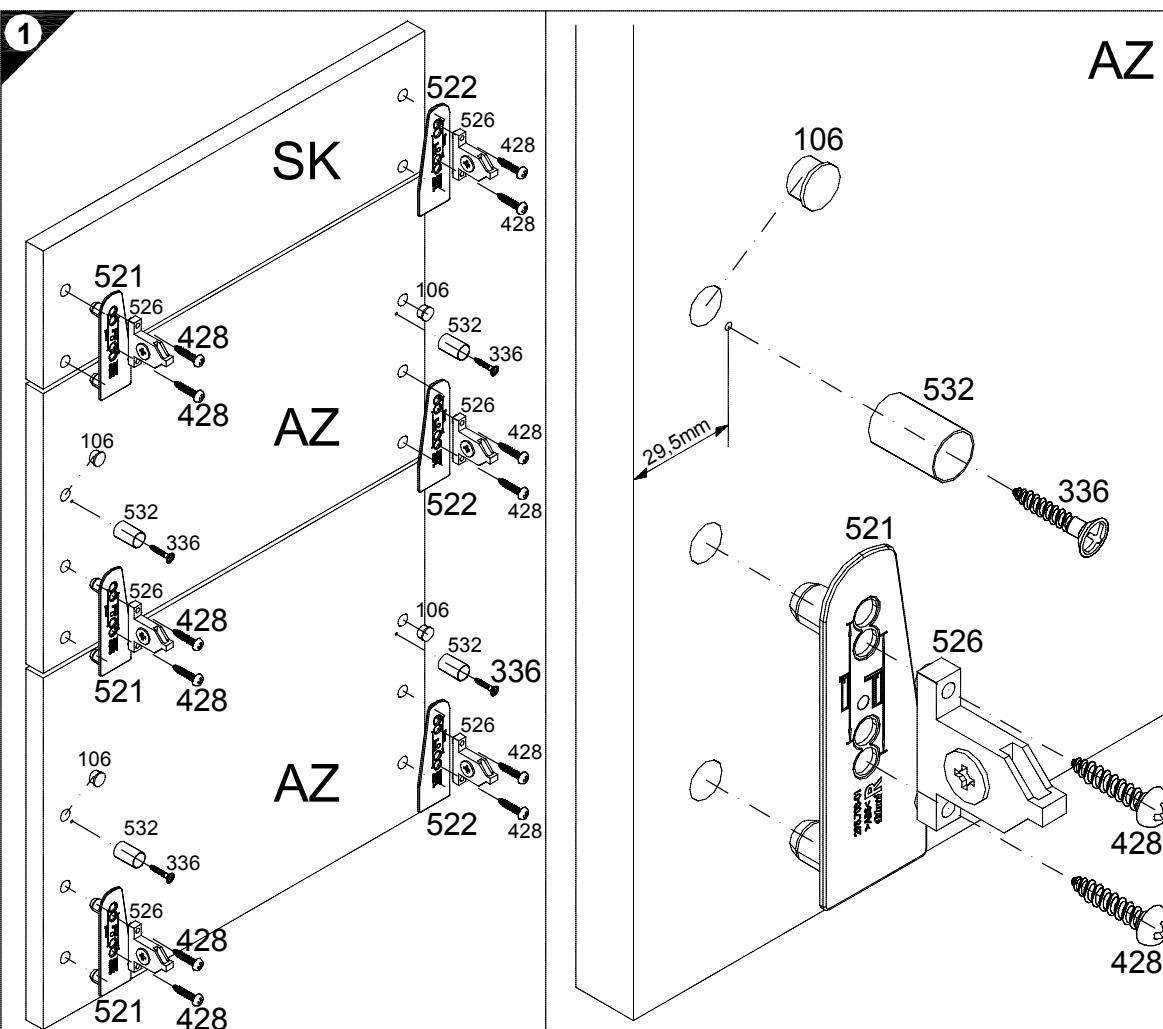

The image shows two types of screws. On the left, a single screw is shown with the text "2x 4 x 15" above it. On the right, a group of six screws is shown with the text "6x 6,3 x 13" above them. A small triangular callout with the number "2" points to the first screw.

Variante 1

SERVICEKARTE

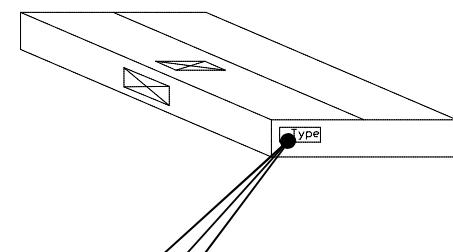

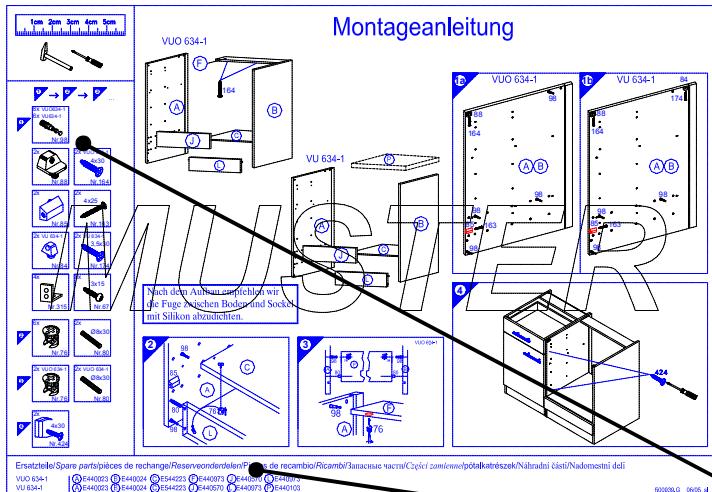

VH

Liebe Kundin, lieber Kunde,

obwohl wir unsere Möbel vor der Auslieferung einer eingehenden Endkontrolle unterziehen, kann es vorkommen, dass einmal ein Zubehörteil fehlt oder während des Transports beschädigt wird. Senden sie den Artikel bitte nicht zurück, sondern fordern sie einfach Ersatz für das Einzelteil bei unserer Kundenhotline an. Die Telefonnummern finden sie auf den Serviceseiten im Katalog.

Bitte benennen sie die Teile wie sie auf ihrer Aufbauanleitung angegeben sind. Fügen sie auch **Artikelnummer, Modellnamen und Farbnummer** bei. **Siehe Beispiel.**

Wir werden ihre Anforderung sofort bearbeiten und ihnen das Ersatzteil umgehend zusenden.

D Pflegehinweise

Kunststoff-Oberflächen:

Kunststoffbeschichtete Oberflächen/Fronten lassen sich mit haushaltsüblichen Reinigungsmitteln pflegen. Am besten geht das mit einem weichen Tuch, handwarmen Wasser und etwas Spülmittel. Verwenden Sie keine polierenden Reinigungsmittel oder harte Schwämme! Hartnäckige Flecken, wie Fettspritzer, Lack- oder Klebstoffreste, sind mit einem handelsüblichen Kunststoffreiniger zu beseitigen. Vor dem ersten Gebrauch dieser Mittel empfiehlt es sich, diese an einer nicht sichtbaren Stelle zu prüfen!

Glänzende Fronten:

Diese Fronten nie trocken reinigen! Die Verwendung von schleifenden Reinigungsmitteln (Mikrofasertücher, Scheuerschwämme etc.) können zu erhöhter Bildung von Kratzern führen und sind kein Reklamationsgrund. Verwenden Sie daher am besten ein staubfreies Tuch oder ein feuchtes Fensterleiter.

Einbauspülen und Herdmulden:

Einbauspülen, Herdmulden sowie alle nicht genannten Artikel aus rostfreiem Stahl pflegen Sie am besten mit einem Schwamm oder einem Vliestuch unter Verwendung von Spülmittel oder mit den bekannten Spezialpflegemitteln (Edelstahlreiniger, Metall-Polish). Bei Einbauspülen aus anderen Materialien wie Porzellan, Kunststoff, Acryl-Keramik sowie bei Edelstahlspülen milde Spül- oder Reinigungsmittel verwenden.

Bitte beachten Sie außerdem die speziellen Pflegehinweise der Hersteller!

Glaskeramik-Kochfelder:

Hartnäckige Verschmutzungen, Kalk- und Wasserflecken sowie glänzenden Topfabrieb beseitigen Sie mit dem vom Hersteller empfohlenen Spezialreiniger (z.B. Cerafix, Stahifix). Festgebrannte Verkrustungen (Zucker, Salz oder zuckerhaltige Speisereste) entfernen Sie, in noch heißem Zustand, mit einem Glasschaber.

Beachten Sie hierzu auch die Bedienungsanleitung des Geräteherstellers!

Griffe:

Verzichten Sie auf lösungsmittelhaltige und aluminiumschädigende Substanzen sowie auf Essigreiniger, da diese zu einer nicht mehr entfernbar Fleckenbildung führen können.

GB Care instructions

Synthetic Surfaces:

Synthetic finishes on surfaces/fronts can be cared for with common household cleaners. It's best to use a soft cloth, hand warm water and a little washing-up liquid. Do not use any polishing cleaners or hard sponges! Stubborn marks, such as grease splashes, paint or adhesive residues can be removed with common, commercially available synthetic materials cleaners. However, it is recommended that these be tested on an inconspicuous area before using them for the first time!

Gloss Fronts:

Never clean these fronts in the dry state! The use of abrasive cleaning materials (microfibre cloths, scrubbing sponges, etc.) can lead to increased incidence of surface scratching and are not accepted grounds for complaints. Therefore using a dustfree cloth or a damp chamois is best.

Fitted Sink Units and Hobs:

Fitted sink units and all other articles made of stainless steel are best cleaned using a sponge or a fleece cloth with a washing-up liquid or known specialty cleaner (stainless steel cleaner, metal polish). Use mild washing-up or cleaning liquids on fitted sinks made of other materials, such as porcelain, synthetic material, acrylic ceramic as well as stainless steel. In addition, make sure to always follow the specific care instructions provided by the respective manufacturer!

Ceramic Glass Hobs:

Stubborn marks, limescale and water spots and shiny marks left by pots are best removed with special cleaners as recommended by the manufacturer. Use a glass scraper to remove burnt-on marks (sugar, salt or food spillages containing sugar) while still hot. Please also refer to the operating instructions provided by the appliance manufacturer!

Handles:

Avoid using substances containing solvents or which are harmful to aluminium, as well as cleaners containing vinegar, as these can cause permanent discolouration.

NL Onderhoudsinstructies

Kunststof-oppervlakken:

Oppervlakken/fronten met een kunststof coating kunnen met een gangbaar huishoudelijk reinigingsmiddel worden verzorgd. Dat gaat het beste met een zacht doekje, handwarm water en een beetje afwasmiddel. Gebruik geen polijstende reinigingsmiddelen of harde sponsjes! Hardnekke vlekken, resten van lak of lijm, moeten met een gangbaar reinigingsmiddel voor kunststof worden verwijderd. Voor het eerste gebruik van dit middel is het aan te bevelen om dit op een niet zichtbare plek uit te proberen!

Glanzende fronten:

Deze fronten nooit droog reinigen! Het gebruik van schurende reinigingsmiddelen (microvezeldoekjes, schuursponsjes etc.) kunnen tot snellere vorming van krasjes leiden en zijn geen reden voor een reclamatie. Gebruik daarom het beste een stofvrij doekje of een vochtige zeem.

Inbouwgootstenen en kookplaten:

Inbouwgootstenen, kookplaten en alle niet genoemde artikelen van roestvast staal reinigt u het beste met een sponsje of een vleesdoek met afwasmiddel of met de bekende speciale reinigers (rvs-reiniger, metaal-polish). Bij gootstenen van andere materialen zoals porselein, kunststof, acryl-keramiek en bij gootstenen van edelstaal milde afwas- of reinigingsmiddelen gebruiken. Neem bovenindien de speciale reinigingsinstructies van de fabrikanten in acht!

Glaskeramische kookplaten:

Hardnekke vuil, kalk- en watervlekken en glanzende slijtplekken van pannen verwijderd u met het door de fabrikant aanbevolen speciale reinigingsmiddel (bijv. Cerafix, Stahifix). Aangekoekte en vastgebrande resten (suiker, zout of suikerhoudende voedselresten) verwijderd u, in nog hete toestand, met een glasschaper. Raadpleeg hiervoor ook de handleiding van de fabrikant van het apparaat!

Grepes:

Gebruik geen oplosmiddelhoudende en aluminium beschadigende substanties en geen schoonmaakazijn omdat deze tot vlekken kunnen leiden die niet meer te verwijderen zijn.

F Conseils d'entretien

Revêtements en plastique :

Les revêtements / fronts en plastique peuvent être entretenus au moyen d'un produit de nettoyage ménager courant. L'idéal est d'utiliser un chiffon doux, de l'eau tiède et un peu de produit pour la vaisselle. N'utilisez pas de produit de polissage ou d'éponges dures ! Eliminez les taches tenaces, telles que les projections de graisse et résidus de vernis ou de colle, au moyen d'un produit de nettoyage pour le plastique courant. Avant la première utilisation de ce produit, il est recommandé de tester celui-ci à un endroit dissimulé !

Fronts brillants :

Leur utilisation de produits de nettoyage abrasifs (chiffons en microfibres, éponges abrasives, etc.) peut entraîner la formation accrue de rayures et ne peuvent justifier aucune réclamation. L'idéal est donc d'utiliser un chiffon non-pelucheux ou une peau de chamois humide.

Éviers encastrés et tables de cuisson :

Tous les éléments en acier inoxydable n'étant pas cités ici doivent être entretenus avec une éponge ou une peau de chamois, imprégnées de produit vaisselle ou d'un produit spécifique (détergent inox, polish métal). Les éviers encastrés fabriqués dans d'autres matériaux, tels que de la porcelaine, du plastique, de la céramique acrylique, ainsi que les éviers en acier inoxydable doivent être nettoyés au moyen de produit vaisselle ou détergent doux. Respectez également les consignes d'entretien spécifiques du fabricant !

Plaques vitrocéramiques :

Eliminez les taches tenaces, les traces de calcaire et d'eau, ainsi que les traces brillantes laissées par les casseroles au moyen du détergent spécial recommandé par le fabricant (par ex. Cerafix, Stahifix). Eliminez les restes carbonisés (sucré, sel ou aliments sucrés) encore chauds au moyen un racloir. Respectez ici les instructions du fabricant de l'appareil !

Poignées :

N'utilisez pas de substances à base de solvant et détériorant l'aluminium ou produits à base de vinaigre ; ceux-ci peuvent causer des taches indélébiles.

IT Consigli di manutenzione

Superfici in materiale sintetico:

Le superfici frontal rivestiti in plastica possono essere trattati con un comune detergente per la casa. È da preferire l'utilizzo di un panno morbido, acqua tiepida e detergente per piatti. Non utilizzare detergenti o spugne di tipo abrasivo! Le macchie più ostinate, come schizzi d'unto, residui di vernici o collanti possono essere rimosse con un comune detergente per superfici sintetiche, reperibile in commercio.

Al primo utilizzo, si consiglia di provare il detergente su un punto non visibile della superficie!

Frontali lucidi:

questo tipo di frontal non deve mai essere pulito da asciutto! L'utilizzo di materiali abrasivi (panni in microfibra, pagliette ecc.) può aumentare il rischio di graffio delle superfici; la presenza di graffi non è da considerarsi motivo valido per alcun reclamo.

Si consiglia l'utilizzo di un panno che non lasci pelucchi o di una pelle di daino umida.

Lavelli e piani cottura da incasso:

Per la manutenzione di lavelli, piani cottura o qualsivoglia altra unità in acciaio inox è consigliabile l'uso di una spugna o di un panno felpato, sapone per piatti o detergente specifico (detergente per acciaio, metalli).

Per la pulizia di lavelli in ceramica, in plastica o in acrilico, così come per quelli in acciaio è consigliabile l'uso di sapone per piatti o di un detergente delicato. Seguire inoltre i consigli per la manutenzione specifici, forniti dal produttore!

Piani cottura in vetro ceramica:

Le macchie più ostinate, il calcare, gli aloni creati dall'acqua, così come i segni lucidi lasciati dai tegami, possono essere rimossi con l'utilizzo di prodotti specifici, consigliati dallo stesso produttore (ad esempio Cerafix, Stahifix). Qualsivoglia incrostazione (di zucchero, sale o di altri alimenti contenenti zucchero) potrà essere rimossa, a piano ancora caldo, con un raschietto per vetro.

Seguire sempre le indicazioni del produttore!

Maniglie:

Evitare l'uso di prodotti contenenti solventi, che possano rovinare le superfici in alluminio o a base d'aceto, tali prodotti potrebbero infatti dar luogo a macchie permanenti.

CZ Pokyny pro ošetrování

Plastové povrchy:

Plastem potažené povrchy/čela lze ošetrovat běžnými čisticími prostředky pro domácnost. Nejlépe provedete ošetření měkkou utěrkou a vlažnou vodou s malým množstvím mycího prostředku. Nepoužívejte leštící čisticí prostředky nebo tvrdé mycí houby! Ulpělé fleky, jako skvrny od vystríknutého tuku, zbytky laku nebo lepidel je nutné odstranit běžným čisticím prostředkem na plasty. Před prvním použitím téhoto prostředku se doporučuje je vyzkoušet na místě, které není viditelné!

Lesklé čelné plochy:

Tato čela nikdy nečistěte nasucho! Používání abrazivních čisticích prostředků (utěrky z mikroválna, drhnoucích mycích houbiček atd.) mohou vést ke zvýšené tvorbě škrábanců a nejsou důvodem k reklamaci. Používejte proto nejlépe bezprašnou utěrku nebo vlhkou kůžu na okna.

Vestavěné dřezy a varné desky:

Vestavěné dřezy, varné desky, jakož i všechny neuvedené artikly z nerezové oceli ošetřujte nejlépe houbičkou nebo utěrkou z netkané textilie s použitím mycího prostředku nebo se známými speciálními ošetřujícími prostředky (čisticí prostředek na ušlechtilou ocel, leštící prostředky na Kov). U vestavěných dřezů z jiných materiálů jako porcelánu, plastu, akrylátové keramiky, jakož i u dřezů z nerezové oceli používejte jemně mycí nebo čisticí prostředky.

Dbejte kromě toho na speciální pokyny pro ošetrování od výrobců!

Sklokeramické varné desky:

Ulpělé nečistoty, zaschlé skvrny usazené a vody, jakož i lesklé stopy po otěru hrnci odstraňujte výrobcem doporučenými speciálními čističky (např. Cerafix, Stahifix). Pevně započené nánosy (cukr, sůl nebo zbytky jídla, obsahující cukr) odstraňujte ještě horké přiloženou skleněnou škrabkou. Dbejte přitom také na návod k obsluze výrobce přístroje!

Madla:

Nepoužívejte látky obsahující rozpouštědla a poškozující hliník, jakož i čistidla obsahující oct, protože to může vést ke vzniku neodstranitelných fleků.

HU Ápolási tudnivalók

Műanyagfelületek:

A műanyag bevonatú felületek/frontok ápolása szokványos háztartási tisztítószerekkel lehetséges. A legjobb a puha törlőkendő, langos víz és némi mosogatószer használata. Ne használjon polírozó hatású tisztítószert vagy kemény szívacsot!

A makacs foltok – pl. ráfröccsent zsír, lakk- vagy ragasztómaradványok – kereskedelemben kapható műanyagtisztítóval távolíthatók el. Az ilyen tisztítószerek első használata előtt ajánlott próbát végezni egy nem látható helyen!

Fényes frontok:

A súrolat hatású tisztítószerek és -eszközök (mikroszálas törlőkendők, súrolószívacsok stb.) használata fokozott karcolódást okoz, amit nem áll módunkban reklamáció alapjául elfogadni.

Ezért a legjobb, ha portementes törlőkendőt vagy ablaktisztító bőrkendőt használ.

Beépített mosogatók és főzőlapok:

A rozsdamentes acélból készült beépített mosogatók, főzőlapok és egyéb meg nem nevezett termékek ápolásának legkíméletesebb módja a szivacs vagy gyapjükendő és némi mosogatószer vagy valamelyik ismert speciális ápolószer (nemesacél tisztító, Metall Polish) használata. Más anyagokból – pl. porcelán, műanyag, akril-kerámia – vagy nemesacélból készült beépített mosogatókhoz kímélő mosogató- vagy tisztítószert használjan.

Kérjük, hogy ezenkívül a speciális gyártói ápolási tudnivalót is vegye figyelembe!

Üvegkerámia főzőlapok:

A makacs szennyeződések, vízkő- és vízfoltokat, valamint az edények okozta fénylező kopásokat a gyártó által ajánlott speciális tisztítóval távolíthatja el (pl. Cerafix, Stahifix).

A ráégett, rásult dolgot (cukrot, sót vagy cukortartalmú ételek maradékot) még forró állapotban, a mellékelt üvegkaparóval távolítsa el.

Ehhez vegye figyelembe a készülékgyártó kezelési útmutatóját!

Fogantyúk:

Ne használjon oldószer tartalmazó és alumíniumot károsító anyagokat, továbbá ecetes tisztítószert, mert ezek maradandó foltosodást okozhatnak.

TR Bakım uyarıları

Plastik yüzeyler:

Plastik kaplı yüzeyler/ön paneler sıradan temizlik maddeleriyle temizlenebilir. Bunun için yumuşak bir bez, ılık su ve biraz deterjan kullanın. Parlaklı temizlik maddeleri veya sert süngerler kullanmayın! Yağ artıkları, boyası veya yapışkan artıkları gibi zor lekeleler i sıradan bir plastik temizleyiciyle temizleyin. Bu maddeleri ilk kez kullanmadan önce bunları önce gürültmeye bir yerde test etmenizi öneriyoruz!

Parlak ön paneler:

Bu panelerleri asla kuruyelektrikle temizlemeyin!

Aşındırıcı temizlik maddelerinin kullanılması (mikro elyaflı bezler, bulaşık teli vs.) daha fazla çizgiye neden olurlar ve şikayet nedeni olarak geçerli değildir. Bu nedenle tozsuz bir bez veya nemli bir güderi bez kullanın.

Ankastre evye ve ocak gözleri:

Ankastre evyeler, ocak gözleri ve paslanmaz çelikten yapılmış bahsi geçmeyen diğer ürünler bir süngerle veya bir keçeli bezle deterjan kullanarak temizleyin (paslanmaz çelik temizleyici, Metall-Polish). Porselen, plastik, akril seramik gibi maddelerden yapılmış evyelerde ve paslanmaz çelik evyelerde yumuşak deterjan kullanın.

Ayrıca üreticinin özel bakım uyarılarını dikkate alın!

Cam seramik ocaklar:

Zorlu kirler, kireç ve su lekelerini üreticinin tavsiye ettiği mızel temizleyiciyle temizleyin (ör. Cerafix, Stahifix). Yanmış kirler (şeker, tuz veya şeker içeren yemek artıkları) sıcak durumdayken bir cam raspayla çıkarın. Bununla ilgili cihaz üreticisinin kullanım kılavuzunu dikkate alın!

Tutamaklar:

Solvent madde içeren, alüminyum zarar veren maddelerden, sirke içeren maddelerden kaçının; bunlar kalıcı lekelere yol açabilirler.

PL Wskazówki do pielęgnacji

Powierzchnie z tworzyw sztucznych:

Powierzchnie powlekane tworzywami sztucznymi można pielęgnować zwykłymi środkami myjącymi, jakie są używane w gospodarstwie domowym. Najlepiej nadaje się do tego miękka śliczeczka, letnia woda i nieco środka myjącego. Nie używać środków do polerowania ani twardych gąbek! Uporczywe plamy, np. tłuszcze, resztki lakieru lub taśmy klejącej, usuwać dostępnymi w handlu środkami do czyszczenia tworzyw sztucznych. Przed pierwszymi ich użyciem zaleca się wypróbowanie w niewidocznym miejscu!

Strongy czołowe z poliskiem:

Tych części nigdy nie czyścić na sucho! Używanie śliczających środków czyszczących (śliczeczek z mikrofibry, gąbki do szorowania itd.) może prowadzić do niesiłowego powstawania rys i nie stanowi podstawy do reklamacji. Dlatego najlepiej jest stosować śliczeczkę wolną od pyłu lub wilgotną skórę do czyszczenia okien.

Wbudowane zlewozmywaki i wnęki kuchenne:

Wbudowane zlewozmywaki, wnęki kuchenne, jak też wszystkie niewymienione artykuły ze stali nierdzewnej najlepiej jest pielęgnować gąbkę lub śliczeczkę z włókniny i płynem do mycia lub znany środkiem specjalnym do pielęgnacji (do czyszczenia stali szlachetnej, polerowania metali). W przypadku zlewozmywaków z innych materiałów, jak porcelana, tworzywo sztuczne, ceramika akrylowa lub stali szlachetnej stosować łagodne środki myjące lub czyszczące. Prosimy poza tym stosować się do szczegółowych instrukcji producenta!

Ceramiczna płyta kuchenna:

Uporczywe zabrudzenia, osady kamienia i zacieki jak też błyszczące odbicie garnków usuwać specjalnym środkiem zalecanym przez producenta (np. Cerafix, Stahifix). Nadpalone resztki (cukier, sól, resztki zawierające cukier) usuwać, w stanie jeszcze gorącym, dołączonym skrobakiem szklanym. Stosować się przy tym także do instrukcji producenta urządzenia!

Uchwyty:

Zrezygnować z substancji zawierających rozpuszczalniki i szkodliwych dla aluminium, jak też na bazie octu, gdyż mogą one prowadzić do powstawania nieusuwalnych plam.

SK Pokyny k údržbe

Povrchy z umelej hmoty:

Povrchy z povrchovou úpravou z umelej hmoty/čelné plochy je možné ošetrovať pomocou čistiacich prostriedkov bežných v domácnosti. Najlepšie to ide mäkkou handričkou, vlažnou vodou a nepatrým množstvom prostriedku na umývanie. Nepoužívajte leštiače čistiace prostriedky ani tvrdé špongie!

Zatrvnuté škvŕny, ako rozstreky oleja, zvyšky laku alebo lepidla, sa musia odstrániť pomocou čistiacich prostriedkov bežných v domácnosti. Pred prvým použitím týchto prostriedkov sa odpôrūča prekontrolovať pôsobenie na nejakom mieste, ktoré nie je vidieť!

Lesklé čelné plochy:

Tieto čelné plochy nikdy nečistíste nasucho!

Použíte brúsiaci čistiace prostriedkov (utierky z mikroválna, špongie na drhnutie atď.) môžu viesť ku zvýšenému tvoreniu škrábancov a tieto nie sú dôvodom na reklamáciu.

Pretu používajte handričku bez príomnosti prachu alebo vlhkú kožu na čistenie skiel.

Vstavané umývadlá a sporáky:

Vstavané umývadlá, sporáky, ako aj všetky neuvedené výrobky z nehrdzavejúcej ocele ošetrujte pomocou špongie alebo utierky z rúna za použitia prostriedku na umývanie alebo pomocou známych špeciálnych čistiacich prostriedkov (čistiaci prostriedok na ušľachtilú ocel, politúra na Kov). Pri vstavaných umývadlach z iných materiálov, ako porcelán, umelá hmota, akryl keramika, ako aj pri umývadlach z ušľachtilej ocele používajte jemné čistiace prostriedky alebo prostriedky na umývanie.

Okrem toho dodržiavajte špeciálne pokyny k ošetrovaniu od výrobcu!

Sklokeramické platne:

Zatrvnuté znečistenia, flaky z vodného kameňa a vody, ako aj lesklý oder z hrncov odstraňujte pomocou špeciálneho čističa odporúčaného výrobcom (napr. Cerafix, Stahifix). Zapečené inkrustácie (cukor, sól alebo zvyšky jedla s obsahom cukru) odstraňujte ešte v horúcom stave pomocou priloženej škrabky na sklo.

Prihladajte pritom aj na návod na obsluhu od výrobcu spotrebiča!

Uchvyty:

Zriecknite sa substancii s obsahom rozpúšťadiel a substancii poškodzujúcich hliník, ako aj octovitých čistiacich prostriedkov, pretože tieto môžu viesť k už neodstraniteľnému škvŕnám

RO Indicații de îngrijire

Suprafete din plastic :

Suprafetele/suprafetele frontale cu strat de acoperire din plastic pot fi îngrijite cu agenti de curătare casnici uzuali. Cea mai bună soluție este cu o cărpă moale , apă caldă și puțin detergent . Nu utilizați substanțe de curătare abraziive sau bureți tan ! Petete persistente, cum sunt stropii de unsure, resturile de vase sau adeziv, se vor înălătura cu un detergent ușual din co.mert, pentru plastic . Înainte de prima utilizare a acestor substanțe, se recomandă verificarea ei într-un loc mai puțin vizibil !

Suprafete frontale strălucitoare :

Nu curătați niciodată uscat aceste suprafete frontale ! Utilizația unor mijloace abraziive de curătare (cărpe cu microfibra, bureți pentru freacă etc.) pot duce la formarea multor zgărieturi și nu constituie un motiv pentru reclamări . De aceea, cel mai bine este să utilizați o cărpă căpătă nu face praf sau o bucată umedă de piele pentru geamuri .

Chiuvete încorporate și locașuri pentru pite :

Chiuvetele încorporate, locașurile pentru pite, precum și toate articolele care nu sunt menționate din setul inoxidabil pot fi îngrijite optim
