CUSTOMER • •

Thank you for shopping, we are always committed to providing high quality products. In rare cases where the product is damaged, parts are missing or there is a problem with assembly, if you have any objections, please interact with us, such as missing parts, and chair assembly problems, we will get you the best solution as soon as possible to solve the problem faster, please show a series of pictures that clearly reflect the product problem. Thank you very much!

TIPPS:

Suggestion: Apply the screws to the frame before the splicing is complete, tighten the screws, but not completely tighten them. 70% to 80% no problem.

Finally, it is all pulled tight if there is no problem in the assembly. If something goes wrong, such as holes that don't align, or parts that don't fit, check the density of the screws.

The legs of the chair are placed inside the sitting frame!
