G Feet	8

If you have any missing components please take note of the part name and contact your supplier

Assembly – 175kg Boltless Shelving Assembly

- 1** Select 2 half uprights **A** attach plastic feet **G** onto the bases and upright connectors **F** into the tops. Knock into place with a rubber mallet if required

- 2** Add second half upright **A** to the upright connector **F** using rubber mallet

- 3** Insert a short side beam **B** into upright **A** at the required level for the lowest shelf and knock into place with a rubber mallet

- 4** Join other end of side beam **B** into same height slot on the second upright **A**

Tip: Ask another person to hold the frames in place while you secure them

- 5** Continue to add side beams **B** to the uprights **A** at the preferred shelf heights to create side frame

- 6** Repeat steps 1 to 5 to create second side frame

Tip: Use the first frame as a template to get the correct spacing

- 7** Add a long front & back beam **C** to upright **A** at the same height as the lowest side beam **B** Tap into place with a rubber mallet

- 8** Slot other end of beam **C** into second side frame at same height

- 9** Repeat steps 7 and 8 to add the rest of the front & back beams **C**

- 10** Slot the beam ties **D** into the loops on the inside of the front & back beams **C** Ensure that the ties are used on each level and that the tabs are bent fully back to secure

- 11** Insert chipboard shelves **E** onto each level

- 12** Your shelving is now complete
