ENVIRONMENTAL CHARACTERISTICS

FEATURE (HAS)	AVANTAGE (WHICH MEANS)	BENEFIT (SO THAT)
Papers used for Post-it® Notes preferably made from certified pulp sources (FSC, PEFC...)	This selection helps contribute to the protection of the environment, namely does not impact the old growth forest by using managed planted woods	Post-it® Notes fulfil customers' environmental expectations by our long history of continuous environmental improvements to minimize the impact of our manufacturing processes and products on the global environment
Post-It® Notes manufactured in an ISO14001 certified factory with on-going pollution prevention actions and programs	Volatile Organic Compounds continuously reduced as documented in the annual 3M France Environmental report	Plant emissions reduced by 98% over 1990-2005 period
	In-process and ultimate paper wastes collected and managed through dedicated waste stream recycling	Manufacturing paper waste shipped to a waste paper collecting company for further recycling
	3M has a strong environmental management system in place according to ISO 14001 standards and regularly checked by notified body since 1996	Pollution risk occurrences minimized at all stages of the manufacturing process as required by ISO14001 principles and practises Factory site practises recognized with 2004 "Enterprise & Environment" national award
Post-It® Notes can be recycled	Notes can be treated like any other office waste paper as documented by 3M Company position letter dated Nov 18,2002	Notes can be disposed in paper office waste bins therefore go through the normal paper recycling waste stream
Post-It® Notes are primarily manufactured locally for European market	Reduction of the shipping/transportation distances between supplier and customer therefore reduces fuel consumption and emissions for delivering goods.	Reduction of the fuel consumption associated with transportation
