

TESLA Smart Vacuum Cleaner Laser AI200

WI-FI
AND APP

MOP
FUNCTION

MAPPING

LASER SENSOR

SPECIFICATION

Power	17 W
Operating temperature	0-40 °C
Dimensions	330x94 mm
Battery capacity	2 600 mAh
Suction power	3 000 Pa
Navigation	Laser
Charging time	5-6 h
Working time	max. 130 min
Dust container volume	0,6 l
Water tank volume	0,35 l
Functions	Virtual wall, mopping, fall sensor, collision sensor, automatic charging, voice control, manual control
Connections	Wi-Fi 802.11b/g/n
App	Tesla Smart app pro Android a iOS
HEUREKA PRODUCT NAME	Tesla Smart Robot Vacuum Laser AI200 TSL-VC-AI200
App language	EN, CZ, SK, PL, HU, DE, SL

WI-FI AND APPS

The robot vacuum cleaner connects to Wi-Fi, so it can be controlled remotely via the Tesla Smart App. You can set up a range of practical automations or scenarios by connecting with other smart home products. And it also works with smart assistants.

MAPPING AND PLANNING

Using the mapping function, the robot vacuum cleaner creates a map of the household. So you can schedule it to clean only in the room where cleaning is needed. And if there is somewhere you don't want to let the robot vacuum cleaner go, you can easily create a virtual wall in the app.

PRACTICAL SENSORS

The laser sensor ensures correct and precise orientation within the space in question. The fall sensor protects the robot vacuum cleaner from falling down the stairs and the collision sensor protects furniture from unnecessary impacts.

PERFORMANCE AND DURABILITY

Large areas are not an obstacle. The 3 000 Pa suction power ensures thorough cleaning of dirt from various types of surfaces. With a 2 600 mAh battery, it can run for up to 130 minutes on a single charge. If you need to vacuum for longer, it automatically returns to the charging station and finishes the job after recharging.

VACUUM AND MOP

Not only does it vacuum but it also mops effectively. Simply replace the dust container with the water tank (350 ml). The robot follows the shape of the letter Y when mopping, ensuring thorough removal of dirt.

Tesla Smart for Android and iOS
