

Smart RGB wake-up light, USB-C

SH-LA01

Wake up refreshed and revitalized with our advanced RGB wake-up light! This innovative device uses a combination of light and sound to gently rouse you from your slumber, simulating a natural sunrise and ensuring you start your day feeling energized and ready to take on the world. But that's not all - this RGB wake-up light is also fully compatible with DELTACO Smart Home, Amazon Alexa, and Google Home, so you can easily control it with your voice or through your smart home devices.

The gradual light and sound provided by a wake-up light can make waking up a more gentle and peaceful experience, reducing the stress and grogginess often associated with traditional alarms. Waking up to a simulated sunrise can help increase energy and mood, as well as promote mental alertness and productivity throughout the day. Versatile use: this wake-up light can also be used as a bedside lamp, reading light, or mood light, providing added value and versatility. Overall, a wake-up light can be a valuable addition to your sleep routine, offering numerous benefits for your physical and mental health.

With the DELTACO Smart Home app, you take care of all the management for your lights. Installation is quick and smooth without the need for special hubs or gateways - all you need is a working wireless network. In the app, you can control individual lamps separately or divide them into different rooms to easily manage a group of lamps. In addition to turning a light on or off, you can also set a timer if you want the light to turn off after a certain time. Alternatively, you can schedule specific times when it should be on or off.

In the DELTACO Smart Home app there is also the possibility to create automatic actions. For example, the light comes on when the sun has gone down, or if you want to group more lights together to do the same thing at a given time.

The app is available for free for both Android and iOS!

USP

- **Several smart functions**
- **Compatible with voice-assistant, Amazon Alexa and Google Home**
- **Fully custom RGB**
- **Wi-Fi (Frequency: 2.4 GHz)**
- **Adjustable color temperature**
- **Dimmable**
- **5 years warranty**

Specification

Product depth	102 mm
