## 3 Assemble the baby walker

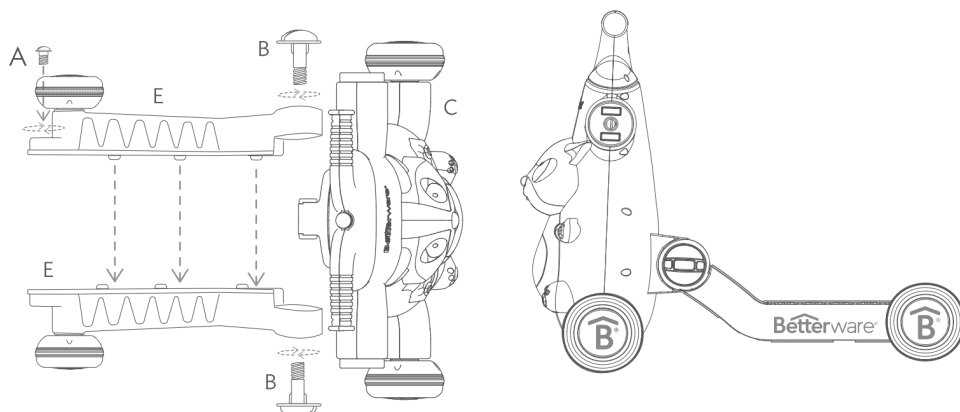

- Can accommodate the support in the image by placing part of the texture (wave) up and screwing the screw.
- Before placing the screws, the bracket must be correctly assembled on the main body.

## 4 Assemble the pedal-free frame

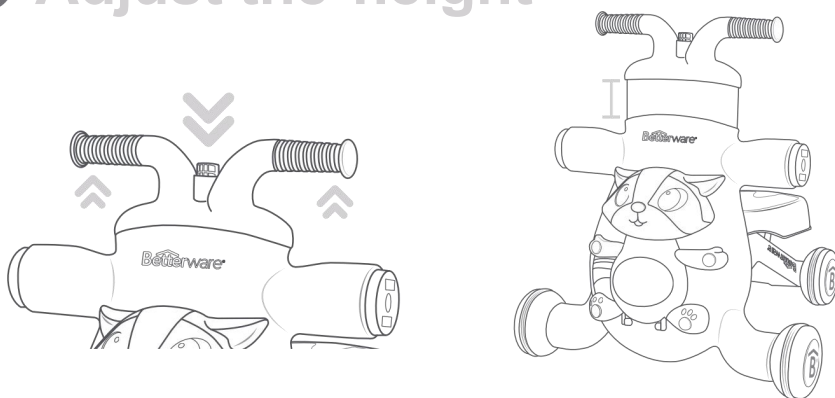

- Position the support bases with the textured surfaces (wave patterns) facing downward.
- Unfold the seat legs, then install the wheels by placing the seat into the center cavities while simultaneously attaching Component C.
- Secure all parts with screws as shown in the illustration.
- Ensure Screw A is properly tightened, as it provides critical stability and safety to the product.

## 5 Assemble the glide base

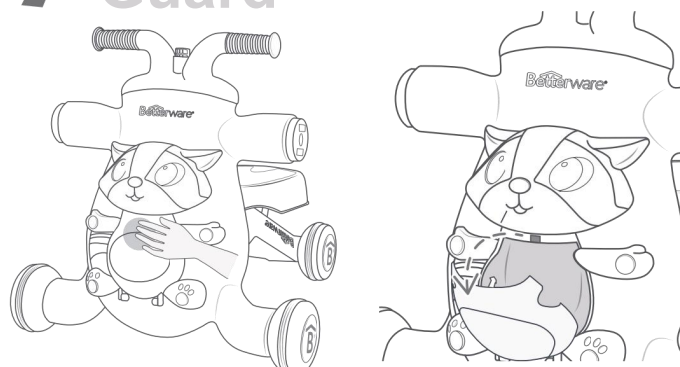

- Position the support brackets as shown in the image, ensuring the textured surface (wave pattern) faces upwards, then securely tighten the screws on the rear.
- Verify Fastener A is properly adjusted, as it provides essential stability and safety to the product.

## 6 Adjust the height

- Press the button and raise the handlebar to the highest position.
- Press the button again to lower the handlebar.

## 7 Guard

Press the upper abdomen area of Roque to open.
