RHEIA

SUPER AUTOMATIC MICRONEEDLE

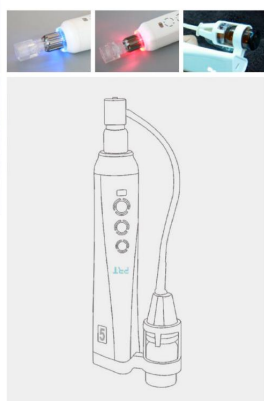

PERFORMANCE 5 Speeds Level

OPTION OF NEEDLES

9 needles | 12 needles | 36 needles | Nano needles

CORE ADVANTAGES

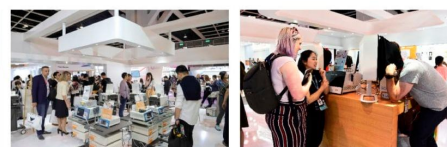

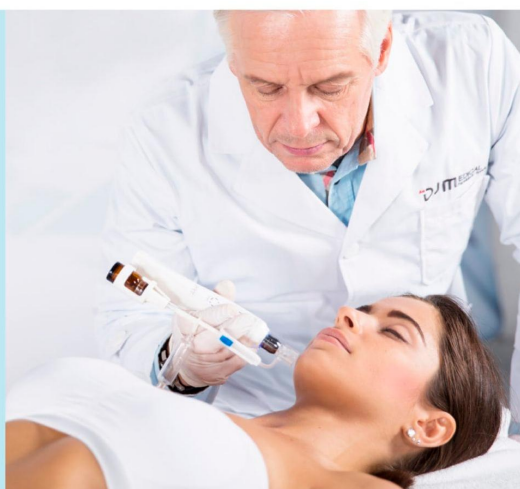

- Intelligent control, 1-5 gears free to shift, LED display.
- Automatic liquid infusion system to help with injection of a certain amount of nutrient solution into the mesoderm at a certain location.
- Visual number adjustment window, on which needle length can be adjusted precisely, so that the inserting depth of needle could be grasped clearly (adjustable extent: 0.1-2mm).
- The App can keep an accurate record of the number of pinholes in the face and users' using habits.
- There are several needles for choice. The specially designed square needle can be used to treat each inch of skin without omission to nourish every cell. Medical phototherapy, intensive whitening, sterilization and anti-inflammation.
- Plug-free charging with USB interface, the disuse of charging cable makes it convenient to put away and carry along.
- Red and blue lights are for choice. Red light promotes blood circulation, blue light for anti-inflammation and sterilization, for a better therapeutic effect.

EFFECT CONTRAST

Verified by big data analysis based on 1 million skin cases worldwide
