Product use

- Five Modes: press button to get High-medium-Low-Strobe-Sos emergency mode.
- Adjustable Focus: Stretch the head of the flashlight to switch the light as broad illumination or focused spotlight. Spot lights help for long-distance lighting, zoomable light help for large area illumination.
- Hidden mobile power-The micro USB port can be used with multiple devices, Flashlight can also be used as a power bank to charge the phone or other devices.
- Tactical Defense-The stainless steel bezel is inlaid with 5x tungsten impact tips. Great for getting out of critical situations.

Precautions Before Use

- Smart shutdown function, there are two ways to close:
 - press the power button to cycle through all the modes to turn it off.
 - Long press for more than 3 seconds in any mode to close.

About Use

- Do not use overpressure, the battery voltage of the flashlight should not exceed 3.7V;
- Please place the battery positive and negative correctly, otherwise the flashlight will not work.
- Do not use the flashlight in a sealed, tight space.
- If the battery is very hot during use, remove the battery immediately and stop using it.
- If you do not use the battery for a long time, you should fully charge the battery and recharge it once in about three months.
- When pressing the button, do not use excessive force; do not force or hit the flashlight button.
- Prevent your kid and anyone any direct eye contact with the emitting light as it will have an effect on your eyes.

Notes on Use

- Do not touch the flashlight with sunlight, water, chemicals and corrosive gases for a long time to avoid damage to the flashlight protective layer.
- Check the battery: Make sure the battery is charged and load the battery in the correct direction. Old and new batteries cannot be mixed.
- Keep the flashlight clean. Never wipe the lens and the translucent sheet with metal or a hard object. Remove the stain on the lens and the translucent sheet. Wipe it gently with a cotton cloth.

- If you do not use the flashlight for a long time, please take out the battery (one month or longer) to avoid chemical corrosion.
- If you use a flashlight in rainy or snowy weather, you must remove the battery, and dry the water on the surface of the flashlight, ensure that there is no water stain inside the flashlight before you can charge the flashlight.
- According to the charging speed of the charger, remove it as soon as the indicator light changes. Do not leave the flashlight charged. The first charge should also be taken out in time according to the change of the charger indication, without charging.
- Prevent your kid and anyone any direct eye contact with the emitting light as it will have an effect on your eyes.
