## WHY WON'T MY HYDRAULIC BED STAY DOWN?

1. In fact, nine times out ten the reason why hydraulic won't close is because you need to put your mattress on top of the bed. Yep, it really is that easy. This is because the hydraulic pistons need the weight of the mattress to provide enough pressure to close your bed.

2. However, what if you've put your mattress on your bed and you're one of the unlucky ones who finds that their hydraulic bed still won't stay down?

As previously mentioned, they require pressure in order to close. However, occasionally as well as placing the mattress on the bed you will initially have to apply some physical force yourself to close the bed. Don't worry you won't break it!!!

## WARUM BLEIBT MEIN HYDRAULISCHES BETT NICHT UNTEN?

1. In neun von zehn Fällen liegt der Grund dafür, dass sich die Hydraulik nicht schließen lässt, darin, dass Sie Ihre Matratze oben auf das Bett legen müssen. Ja, es ist wirklich so einfach. Das liegt daran, dass die Hydraulikkolben das Gewicht der Matratze benötigen, um genügend Druck zum Schließen des Bettes zu erzeugen.

2. Was aber, wenn Sie Ihre Matratze auf Ihr Bett gelegt haben und zu den Unglücklichen gehören, die feststellen, dass ihr hydraulisches Bett trotzdem nicht unten bleibt?

Wie bereits erwähnt, muss man Druck ausüben, um sie zu schließen. Gelegentlich müssen Sie jedoch nicht nur die Matratze auf das Bett legen, sondern zunächst selbst etwas Kraft aufwenden, um das Bett zu schließen. Keine Sorge, Sie werden es nicht kaputt machen!!!

## IMPORTANT NOTICE

### OTTOMAN OPERATING INSTRUCTIONS

Once your bed frame is completely assembled, the slat unit will not operate correctly unless a mattress is placed on the slat frame. Position the mattress on the slat frame whilst it is in the closed position.

**PLEASE NOTE** - It takes a lot of force to make the initial movement of the ottoman. This is a design feature of the product so that it does not fall shut - the nearer to being closed the ottoman is, the easier it is to move. When the ottoman is almost shut, it will close completely under its own weight.

When lowering the slat unit for the first time, take care to make sure it does not rub unevenly on the inside face of the side rails. If it does, the bed has been assembled slightly out of square. This can be rectified by moving the foot end of the bed slightly to the left or right whilst leaving the head end stationary.

### PISTONS

The pistons used in the construction of this product are extremely strong and cannot be operated by hand when taken off the ottoman. All pistons are tested for correct pressure and operation before being attached to the slat unit.

Initially it might appear that the pistons are very stiff when opening and closing the ottoman.

#### THIS IS PERFECTLY NORMAL

When fully assembled and the mattress is in position, please raise and lower the ottoman 4/5 times to ensure the gas piston are fully lubricated.

## LED light

If you can't let the lights work successfully, please check the following:

1. Please check the direction of the connect, try it in the opposite direction, according to the following picture.
2. Please check the remote control, it need you to tear down the plastic septum before use it.
3. Don't let the remote control too far from the receiver, make sure there is no obstruction between them.
4. If one of the colors is not bright, please check whether the four wires in the plug are skewed, and move the main line to make the four wires flush.

- 1 Please check the direction of the arrow
- 2 Please pull the plastic block out of the remote control
- 3 Please check whether the four wires of the plug are neat

## Operation Instructions of Controller

### I .Specifications:

Working temperature : -20-60 °C      Supply voltage: DC12V  
 Output: Three CMOS drain- open output      Connecting Mode : Common anode  
 Max load current : 2 A each color

### II .Control Method:

Adopt IR remoter to control the led controller, which has 24 buttons, the function of each button as the table below:

Brightness +(Speed up)	Brightness - (Speed down)	Off	On
Static red	Static green	Static blue	Static white
Static orange	Static pea green	Static dark blue	7 color jumpy change
Static dark yellow	Static cyan	Static brown	All fade out&fade in
Static yellow	Static light blue	Static pink	7 color fade change
Static straw yellow	Static sky blue	Static purple	3 base color jumpy

### III .Panel specification and connecting drawing as follows:

### IV .Warning:

1. Supply voltage of this product is DC12V never connect to DC24V or AC220V.
2. Never connect two wires directly in case of short circuit.
3. Lead wire should be connected correctly according to colors that connecting diagram offers.
4. Warranty of this product is one year, in this period we guarantee replacement or repairing with no charge, but exclude the artificial situation of damaged or overload working.

## ! WARNING

THIS PRODUCT CONTAINS A BUTTON BATTERY

If swallowed, a lithium button battery can cause severe or fatal injuries within 2 hours.

Keep batteries out of reach of children.

If you think batteries may have been swallowed or placed inside any part of the body, seek immediate medical attention.
