

This projector series significantly enhances your entertainment experience and viewing effects!

✓ **Clear Full HD Visuals**

With our LCD true-color fully enclosed optical engine solution and 4K-ready technology, you can experience an unparalleled movie night. Whether you're watching your favorite movies or other streaming content, clear images and vibrant colors will immerse you in the action.

✓ **Outstanding White Light High Brightness LED Technology**

Our white light high brightness LED technology solution utilizes high-power low-density packaging technology, providing stunning brightness and color accuracy. Say goodbye to faded yellowish visuals - every frame boasts lifelike clarity, bringing each scene to life.

✓ **Adjustable Screen Sizes to Meet Your Needs**

From cozy 17-inch displays for intimate gatherings to impressive 180-inch movie screens, each size is easily achievable. Whether indoors or outdoors, immerse yourself in thrilling entertainment.

✓ **Seamless Connectivity and Smart Features**

All devices can be equipped with the Android operating system, allowing easy access to applications, streaming content, and seamless user experience. Wireless Airplay and Miracast support screen sharing from any device - whether it's a smartphone, tablet, or laptop. Additionally, with USB plug-and-play, the built-in media player can quickly activate offline files or movies from USB or hard drives.

✓ **Stylish Design, Powerful Sound**

This series' design, validated by the market, is not only recognized for its visual appeal but also respected for its unique industrial design. With its compact size, it seamlessly integrates into your home.
