

## Smart Neon RGB LED-strip, 5m

SH-LSN5M

The neon RGB LED-strip is not only aesthetically pleasing, but it's also energy-efficient and easy to install. Its flexible design allows for easy customization, so you can mold it to fit any shape or size

With a remote control, you can switch between 20 different colors and 6 dynamic modes to create the perfect atmosphere. Whether you're looking for a calming blue, a romantic red, or a vibrant rainbow effect, our neon RGB LED-strip has got you covered. So why settle for boring, static lighting when you can have a neon RGB LED-strip?

With the DELTACO Smart Home app, you take care of all the management for your lights. Installation is quick and smooth without the need for special hubs or gateways - all you need is a working wireless network. In the app, you can control individual lamps separately or divide them into different rooms to easily manage a group of lamps. In addition to turning a light on or off, you can also set a timer if you want the light to turn off after a certain time. Alternatively, you can schedule specific times when it should be on or off.

In the app there is also the possibility to create automatic actions. For example, the light comes on when the sun has gone down, or if you want to group more lights together to do the same thing at a given time.

The DELTACO Smart Home app is available for free for both Android and iOS!
