### Product Description

**Tip position**  
Strong, strong water pressure suitable for deep cleaning and cavity treatment.  
High flow water pressure, high efficiency cleaning suitable for white cleaning of teeth.  
Soft, low pressure, suitable for sensitive gum and tooth pain.  
Soft, low pressure, suitable for sensitive gum and tooth pain.  
Soft, low pressure, suitable for sensitive gum and tooth pain.

**Switch and mode selection.**  
1 Press and hold to turn water flow on.  
2 Press and hold to turn water flow off.

**Water Control**  
1 Press and hold to turn water flow on.  
2 Press and hold to turn water flow off.

**Battery Information**  
Water reservoir indicator: Shows capacity.  
Battery level indicator: Shows battery level.

### Installation and removal of jet tips

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Water Control

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Jet Tip

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Main Body

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Suction Pipe

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Troubleshooting Guide

Problem	Reason	Recommended action
Water does not flow	Water reservoir is empty	Fill with water
Water flow is weak	Jet tip is blocked	Replace jet tip
Water flow is too strong	Water pressure is too high	Reduce water pressure

### Wichtige Sicherheitsmaßnahmen

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Produktbeschreibung

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Ein- und Ausbau von Düsentipps

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Ein- und Ausbau von Disenstipps

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Reinigungsanleitung

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Wassertank

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Jet-Tipp

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Tippen Sie auf die Position

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Schalten und Modusauswahl

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Ein- und Ausbau von Disenstipps

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Reinigungsanleitung

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Wassertank

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Jet-Tipp

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Header Körper

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Salvaguardie importanti

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Leitfaden zur Fehlerbehebung

Problem	Ursache	Aktion zur Behebung
Wasser fließt nicht	Wassertank ist leer	Wassertank füllen
Wasser fließt schwach	Düsentipp ist blockiert	Düsentipp austauschen
Wasser fließt zu stark	Wasserdruck ist zu hoch	Wasserdruck senken

### Avvertimento

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Descrizione del prodotto

**Togliere la posizione**  
1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Interruttore e selezione della modalità

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Informazioni sulla batteria

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Installazione e rimozione di punta a getto

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Corpo principale

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Tubo di aspirazione

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Tubo di pulizia

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Guida alla pulizia

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Garantías importantes

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Description du produit

**Position du robinet**  
1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Commutateur et sélection de mode

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Guide de nettoyage

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Points de jet

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.

### Garantías importantes

1. Press and hold to turn water flow on.  
2. Press and hold to turn water flow off.
