Tier 2

<sup>1</sup>AMD FreeSync™ Premium works only with AMD Radeon series graphic card.

<sup>2</sup>Moving Picture Response Time (MPRT) improves display response time and reduces motion blur. Enabling MPRT will disable AMD FreeSync™, and you may notice a negligible flicker.

<sup>3</sup>This software can be used with Windows 10 only.

Depending on many factors such as the processing capability of peripheral devices, file attributes, and other factors related to system configuration and operating environments, the actual transfer rate using the various USB connectors on this device will vary and is typically slower than the data rates as defined by the respective USB specifications: 5 Gbit/s for USB 3.1 Gen1; 10 Gbit/s for USB 3.1 Gen2 & 20 Gbit/s for USB 3.2.
