- Play Anywhere*

WE CALL IT THE WORLD'S MOST FUN INDOOR BALL GAME

- Pitjau is a game played with an incredibly light ball. You play with your hands. A player, or a team, has 3 strokes to get the ball back through the ring
- It makes it possible to play ball even in small apartments without anything breaking
- Move your body and have fun with your friends and family

DOING SOMETHING OTHER THAN SCREENTIME WHEN IT RAINS...

- More time together
- Away from tablets
- Playing more
- Moving your body
- Having fun

THERE'S ALWAYS A REASON TO PLAY PITJAU®

- Play outside when there's no wind
- Instant fun
- Easy to learn
- 2-20 players
- Set it up and put it away fast

...AND HOW TO PLAY THE GAME

SERIES

The game can be played with a colleague at work, as a break after lunch **1 ON 1**, with the whole family **ROUND THE NET**, with your friends or as a tournament game in larger indoor areas **2 ON 2**.

With the Pitjau ball in your pocket, you can always play and have fun, almost everywhere.

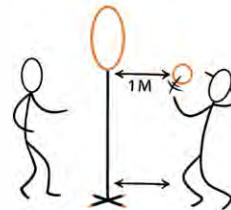

BASIC RULES:

THE SERVE

- Always serve with a fully inflated ball
- Serving height is under the orange ring
- Serving distance, from the ball and the body, is 1 meter from the ring
- A serve is one hit only
- As in tennis you have 2 serves
- If a serve goes through, but touches the ring, the serve does not count. Serve again

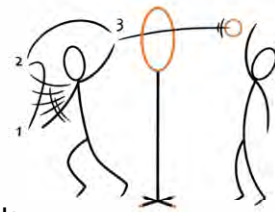

NO BLOCKING

- No blocking is allowed

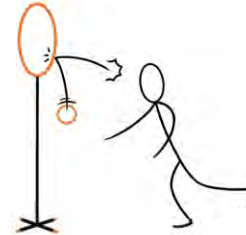

MAX 3 TOUCHES

- After the serve, you have maximum 3 touches to get the ball back through the ring
- You can use all body parts to play
- If your opponent ie. hits the ball on your chest, you have already used your first touch

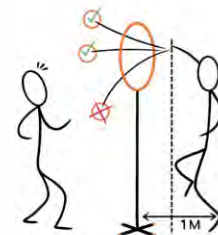

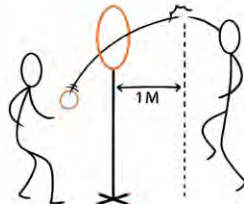

BOUNCE OF RING

- If the ball hits the orange ring and bounces back, you have 3 new touches to get the ball through.
- This you can only do again after the ball has passed through the ring

SMASH DISTANCE

- For close shots (1 meter) you must shoot straight or shoot upwards
- At a distance further away than 1 meter from the ring, shooting downwards is allowed

TOUCHING THE RING

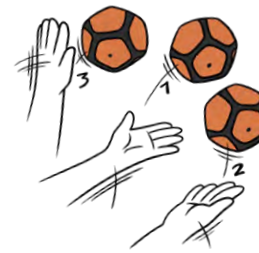

- If a player touches any part of the ring or the stand, the point is lost

Place the hole approx. 2-3 cm away from the mouth, and blow air to inflate the ball.

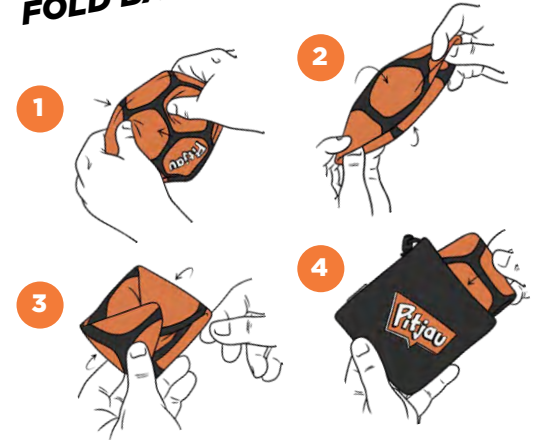

BLOW AIR INTO THE BALL

You can also inflate the ball by hitting the ball with a rounded open palm.

Try practicing the **up - up - hit technique** using both left and right hand to gain control while playing without the ring.

FOR OPTIMUM PERFORMANCE, FOLD BALL AFTER USE

If you carefully fold the ball, you will experience longer durability and better performance from the Pitjau® ball.

ULTRA-LIGHT & UNIQUE BALL

The Pitjau® Ball is special. It weighs less than 5 grams. It has a small hole in one of the pentagons.

This unique design enables you to do extraordinary stuff:

- Play ball in the living room - without breaking anything
- Inflating a flat Pitjau ball just by hitting it
- Spin and curve the ball anyway you want
- Having a ball in your in your pocket, and always the option to play wherever you are
