## (EN) English

- Product specifications see Table 1 & Table 2.
1. Product Specifications, see Table 1 and Table 2.
2. Charge, see Figure 1.
3. The light head can be turned 90 degrees, as shown in Figure 2.
- Note: The hinge is a fragile component, so please handle with care. Avoid dropping after rotating the head to a specific angle.
4. HOW TO OPERATE
- 4.1 ON/OFF, see Figure 3:
- Press the button to turn on/off. The flashlight will directly access the memorized brightness level when turned on again.
- 4.2 Lock/Unlock, see Figure 4:
- To lock the light when it's off, press and hold the button (for about 2 seconds) until the Moonlight mode (if it is operated in lockout mode), the red indicator will be on briefly as a signal. To unlock the light, press and hold the button for about 1 second until the Moonlight mode is on.
- 4.3 Change brightness level, see Figure 5:
- In white light mode, press and hold the button to change brightness levels. The brightness will cycle through the following modes: Moonlight (or Turbo) -> Low -> Medium -> High -> Low. Release the button to select the brightness level.
- 4.4 Moonlight mode, see Figure 6:
- In off state, press and hold the button for over 1 second to enter the Moonlight mode. If the memorized mode is Moonlight, just press the button.
- 4.5 Turbo mode, see Figure 7:
- Quickly double press the button to enter Turbo mode, and quickly double press again to return to the memorized mode.
- 4.6 Stroke mode, see Figure 8:
- Triple press the button to activate stroke mode.
