**Liebe Kundin,  
lieber Kunde,**

vielen Dank für Ihre Bestellung! Gleichgültig, ob Sie ein aus Naturholz gefertigtes Möbelstück gekauft haben, eine Hochglanzfront oder eine matte Kunststoff front – jedes Möbelstück hat seine ganz speziellen Eigenschaften. Auch Holzbeschaffenheit und -struktur, wie zum Beispiel kleinere Äste bei Naturholzmöbeln, sind Teil der individuellen Ausstrahlung jedes einzelnen Möbelstücks. Da Möbel aus Naturholz ständigen Klima- und Feuchtigkeitsschwankungen ausgesetzt sind, können vereinzelt Veränderungen in der Oberfläche auftreten wie z.B. Haarrisse oder Farbveränderungen. Generell nimmt im Laufe der Zeit die Helligkeit ab und die Farbsättigung zu – das Holz dunkelt nach. Die genannten Veränderungen sind bei einem Natur-Rohsto wie Holz ein normaler Prozess. Dieses Büchlein soll Ihnen ein paar Tipps zur Pflege Ihres Möbelstücks geben, damit Sie lange Freude daran haben können.

#### Grundsätzlich gilt:

- Keine heißen Gegenstände auf die Möbel stellen.
- Keine Kerzen direkt auf die Möbel stellen.
- Verschüttete Flüssigkeiten sofort aufwischen.
- In regelmäßigen Abständen den festen Sitz von Schrauben und Beschlägen kontrollieren.
- Der typische, aromatische Holzgeruch ist bei Naturholzmöbeln immer ein Qualitätsbeweis.
- Helle Stellen an den Ästen entstehen durch einen natürlichen Harzaustritt und können mit einem trockenen, fusselfreien Tuch abpoliert werden.
- Auch von anderen Holz-, Lack-, Leder- oder Polstermaterialien ist ein schwacher Eigengeruch am Anfang unvermeidbar. Diese Gerüche verschwinden nach einiger Zeit von allein. Wenn Sie dem nachhelfen wollen, lüften Sie in der Anfangszeit häufiger und/oder wischen Sie die Möbel leicht feucht mit Wasser aus, das mit ein wenig Essig versetzt ist.
- Bewahren Sie diese Hinweise gut auf.

#### Pflegehinweise für gelaugte/geölte Möbel aus Naturholz

Die Oberfläche Ihres neuen Möbelstücks ist mit rein biologischem Öl behandelt. Um diesen natürlichen, gelaugt/geöhten Glanz zu bewahren, empfehlen wir eine gelegentliche Nachbehandlung mit geeignetem Möbelöl. Da durch die Art der Oberflächenbehandlung evtl. Rückstände des Naturöls zurückbleiben können, empfehlen wir Ihnen, die Möbel mit einem fusselfreien Tuch abzureiben. Das Tuch nach Gebrauch trocknen lassen und erst dann entsorgen.

#### Pflegehinweise für naturbelassene/gelackte Möbel aus Naturholz

Die Oberfläche lässt sich am besten mit einem mäßig feuchten Tuch säubern.

**Achtung:** Ätzende oder lösungsmittelhaltige Reinigungsmittel oder Politur dürfen nicht verwendet werden.

#### Pflegehinweise für Möbel aus Plattenwerksto en

Verwenden Sie zur Pflege Ihres Möbels aus Plattenwerksto en am besten ein weiches, nicht fusselfendes Tuch oder ein Ledertuch. Wischen Sie die Oberflächen leicht feucht ab.

**Grundsätzlich gilt:** Verwenden Sie bitte auf keinen Fall folgende Reinigungs- und Putzmittel:

- **Microfasertücher** oder **Schmutzradierer**. Diese enthalten häufig feine Schleifpartikel, die zu einem Zerkratzen der Oberflächen führen können;
- **scharfe chemische Substanzen** sowie **scheuernde Putz- oder Lösungsmittel**. Diese können die Oberflächen ebenfalls beschädigen;
- **Scheuerpulver, Stahlwolle** oder **Topfkratzer**. Sie zerstören die Oberfläche so stark, dass eine Aufarbeitung nicht mehr möglich ist;
- **Staubsauger**. Düsen und Bürsten können die Oberflächen zerkratzen;
- **Dampfreiniger**. Durch den hohen Druck und die Hitze, mit denen der Wasserdampf auf die Oberflächen trifft, können diese beschädigt werden oder sich sogar vom Untergrund ablösen.

**Beste klant,**

Hartelijk dank voor uw bestelling! Het maakt niet uit of u een meubelstuk van natuurhout, een hoogglanzende voorkant of een matte plastic voorkant hebt gekocht – elk meubelstuk heeft zijn heel bijzondere eigenschappen. Ook de staat en structuur van het hout zoals kleinere takken bij natuurhouten meubelen maken deel uit van de individuele look van elk afzonderlijk meubelstuk. Omdat meubelen van natuurhout zijn blootgesteld aan permanente klimaatvochtigheidsschommelingen, kunnen er af en toe wijzigingen optreden van de bovenlaag zoals haarscheurtjes of kleurveranderingen. In het algemeen neemt na verloop van tijd de helderheid af en de kleurverzadiging toe – het hout wordt donkerder. De genoemde wijzigingen vormen bij een natuurlijke grondstof zoals hout een normaal proces. Dit boekje moet u een paar tips geven over het onderhoud van uw meubelstuk, zodat u er lange tijd plezier aan kunt beleven.

#### In principe geldt:

- Plaats geen hete voorwerpen op de meubelen.
- Plaats geen kaarsen direct op de meubelen.
- Veeg gemorste vloeistoffen en direct af.
- Controleer met regelmatige intervallen het stevige houvast van schroeven en beslag.
- De typische, aromatische houtgeur is steeds een kwaliteitsbewijs bij natuurhouten meubelen.
- Heldere plaatsen aan de takken ontstaan door een natuurlijk uitdreden van hars en kunnen worden weggepolijst met een droge, pluisjesvrije doek.
- Ook van andere houten, gelakte, lederen of gestoepde materialen is een zwakke eigen reuk bij het begin niet te vermijden. Deze geuren verdwijnen na enige tijd vanzelf. Als u wilt dat het sneller gaat, verlucht u in het begin vaker en/of veegt de meubelen lichtjes vochtig af met water, dat een beetje is aangelengd met azijn.
- Bewaar deze instructies goed.

#### Onderhoudsinstructies voor geloopte/geoliede meubelen van natuurhout

De bovenlaag van uw nieuw meubelstuk is behandeld met puur biologische olie. Om deze natuurlijke, geloopte/geoliede glans te bewaren, raden we u aan het meubel af en toe verder te behandelen met een geschikte meubelolie. Omdat door de soort oppervlaktebehandeling eventuele resten van natuurolie kunnen achterblijven, raden we u aan de meubelen af te wrijven met een pluisjesvrije doek. De doek na gebruik laten drogen en eerst dan wegwerpen.

#### Onderhoudsinstructies voor natuurlijke/gelakte meubelen van natuurhout

De bovenlaag kan het best met een matig vochtige doek worden gereinigd.

**Opgelet:** Bijtende of oplosmiddelhoudende reinigingsmiddelen of polijter mogen niet worden gebruikt.

## Onderhoudsinstructies voor meubelen van plaatmateriaal

Gebruik voor de reiniging van uw meubel van plaatmateriaal het best een zachte, niet pluizige doek of een leren doek. Veeg de oppervlakten ietwat vochtig af.

**In principe geldt:** Gebruik **zeker niet** volgende reinigings- en poetsmiddelen:

- **microvezeldoeken** of **vuilgommen**. Deze bevatten vaak fijne slijpdeeltjes die kunnen leiden tot krassen op de oppervlakken;
- **scherpe chemische substanties** zoals **schurende poets- of oplosmiddelen**. Deze kunnen de oppervlakken eveneens beschadigen;
- **schuurpoeder, staalwol of pannensponzen**. Ze vernielen het oppervlak zo erg dat een reparatie niet meer mogelijk is;
- **stofzuiger**. Mondstukken en borstels kunnen krassen op de oppervlakken veroorzaken;
- **stoomreiniger**. Door de hoge druk en de hitte, waarmee de stoom op de onderlagen komt, kunnen deze worden beschadigd of zelfs loskomen van de ondergrond.

Dear customer,

Thank you for your order! No matter if you bought a piece of furniture made from natural wood, a high-gloss front or a plastic front – every piece of furniture has unique characteristics. Even the texture and structure of wood, such as small knots in natural wood furniture, are part of the individual charisma of each piece of furniture. Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens. The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for your piece of furniture so that you can enjoy it for a long time.

### The following applies in general:

- Don't place any hot objects on the furniture.
- Don't place candles directly on the furniture.
- Immediately wipe off any spilled liquids.
- Regularly check if the screws and fittings are tight.
- The typical, aromatic wooden odour is always a proof of quality for natural wood furniture.
- The natural emission of resin may produce bright spots on the knots which can be polished with a dry, lint-free cloth.
- Initially, a slight intrinsic odour is unavoidable for other wooden, paint, leather or upholstery materials too. These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe out the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar.
- Keep these notes in a safe place.

### Care notes for stripped/oiled furniture made of natural wood

The surface of your new piece of furniture has been treated with pure organic oil. We recommend an occasional after treatment with suitable furniture oil to preserve this natural, stripped/oil gloss. Since some residue of natural oil may remain on the furniture due to the surface treatment method, we recommend to rub off the furniture with a lint-free cloth. After use, let the cloth dry completely before disposal.

### Care notes for untreated/painted furniture made of natural wood

Using a moderately damp cloth is the most suitable method for cleaning the surface. **Attention:** Corrosive cleaners as well as cleaners containing solvents or polish must not be used.

### Care notes for furniture made of panel materials

We recommend using a soft, lint-free cloth or a shammy for conditioning your piece of furniture made of panel materials. Wipe off the surfaces with a slightly damp cloth or shammy.

### The following applies in general:

Please don't use the following detergents or cleaning agents **at all**:

- **microfibre cloths** or **dirt erasers**. They often contain fine abrasive particles which can cause scratches on the surfaces;
- **aggressive chemical substances** as well as **abrasive cleaning agents or solvents**. They may damage the surfaces too;
- **scouring powder, steel wool or scouring pads**. They destroy the surface so badly that reconditioning is impossible;
- **vacuum cleaners**. The nozzles and brushes can cause scratches on the surfaces;
- **steam cleaners**. The surfaces may be damaged or separated from the ground due to the high pressure and heat of the water vapour.

Gentili clienti,

sentiti ringraziamenti per il vostro ordine! A prescindere che abbiate scelto un mobile realizzato in legno naturale, un fronte lucido o un fronte di materiale plastico opaco – ogni esemplare ha la sua particolarità. Anche le caratteristiche e la struttura del legno, quali ad esempio rami minori nei mobili di legno naturale, sono parte del fascino individuale di ogni singolo mobile.

Dato che i mobili in legno naturale sono esposti al continuo variare del clima e dell'umidità, è probabile che in superficie insorgano mutamenti quali crepe capillari o cambiamenti di colore. Generalmente con passar del tempo diminuisce la chiarezza e aumenta la saturazione del colore – il legno si scurisce. I citati mutamenti sono un normale processo dei materiali naturali, quali appunto il legno.

Il presente libretto intende darvi alcuni suggerimenti sulla cura del vostro mobile, a nonché vi procuri lunghe soddisfazioni.

## Sostanzialmente vale:

- Non poggiare oggetti roventi sui mobili.
- Non poggiare candele a diretto contatto dei mobili.
- Asciugare subito i liquidi sversati.
- Ad intervalli periodici controllare se viti e cerniere sono salde.
- Il caratteristico odore fragrante è sempre una prova di qualità dei mobili in legno naturale.
- Le macchie chiare sui rami si formano per via della naturale fuoriuscita di resina, e sono levigabili con un panno asciutto che non lascia peli.
- Anche trattandosi di altri materiali lignei, di vernice, pelle o imbottiti, all'inizio è inevitabile un leggero odore caratteristico. Dopo qualche tempo però, questi odori svaniscono da sé. Potete aiutare a farli volatilizzare in minor tempo cambiando più spesso aria all'inizio e/o passando sui mobili un panno umido d'acqua con qualche goccia d'aceto.
- Conservare bene le presenti istruzioni.

## Istruzioni sulla cura dei mobili in legno naturale lisciviato/oliato

La superficie di questo vostro nuovo mobile è trattata con olio puramente biologico. Per mantenere la naturale lucentezza lisciviata/oliata, vi consigliamo di ripetere il trattamento con un adeguato olio per mobili. Dato che per via del trattamento superficiale possono eventualmente residuarsi tracce di prodotto, vi consigliamo di strofinare i mobili con un panno che non lascia peli. Fate asciugare il panno usato prima di smaltirlo.

## Istruzioni sulla cura dei mobili in legno naturale non trattato/verniciato

Il modo migliore di pulire la superficie è usare un panno moderatamente umido.

**Attenzione:** Non utilizzare lucidi per mobili oppure detergenti abrasivi o a base di solventi.

## Istruzioni sulla cura dei mobili in materiali pannellati

Per la cura dei mobili in materiali pannellati si consiglia di usare un panno morbido, che non lascia peli, o un panno di pelle. Passare il panno leggermente umido sulle superfici.

**Sostanzialmente vale:** In nessun caso utilizzare i seguenti detergenti e prodotti per la pulizia:

- **panni in microfibra o spugne a tampone**. Questi prodotti contengono spesso fini particelle abrasive, che possono provocare sgrature sui mobili;
- **forti sostanze chimiche** nonché **detergenti o solventi abrasivi**. Anche questi prodotti possono aggredire le superfici.
- **polvere abrasiva, paglietta d'acciaio o spugne abrasive**. Rovinerebbero la superficie in modo tale che non sarebbe più possibile ripararle;
- **aspirapolvere**. Bocchette e spazzole possono sgrattare le superfici;
- **pulitrice a vapore**. Per via dell'elevata pressione e calore con cui il vapore colpisce le superfici, esse rischiano di deteriorarsi o addirittura staccarsi dalla sottostruttura.

Chère cliente,  
cher client,

Merci pour votre commande !

Peu importe que vous ayez acheté un meuble fabriqué en bois naturel, un face haute brillance ou une face en plastique mat – chaque meuble a ses propriétés spécifiques. Même les propriétés et la structure du bois, comme par exemple les petits nœuds sur des meubles en bois naturel, font partie de l'aspect de chaque meuble.

Comme le meuble en bois naturel est soumis aux variations permanentes du climat et de l'humidité, il se peut que quelques modifications surviennent sur la surface, comme par exemple de fines fissures ou des décolorations. En règle générale, au cours du temps, la clarté du bois diminue et son intensité de couleur augmente – le bois devient foncé. Les modifications susnommées sont un processus normal des matières naturelles comme le bois. Ce petit livret vous donne quelques astuces sur l'entretien de votre meuble pour que vous puissiez en profiter longtemps.

## En règle générale :

- Ne pas poser d'objets chauds sur le meuble.
- Ne pas poser de bougies directement sur le meuble.
- Essuyer immédiatement les liquides renversés.
- À intervalles réguliers, contrôler que les vis et les ferrures sont bien en place.
- L'odeur aromatique typique du bois est toujours une preuve de qualité des meubles en bois naturel.
- Les endroits clairs sur les nœuds se produisent par une sécrétion naturelle de résine qui s'élimine avec un chi on sec non pelucheux.
- Les autres matériaux comme le bois, la peinture, le cuir ou le rembourrage dégagent inévitablement une légère odeur. Ces odeurs disparaissent d'elles-mêmes avec le temps. Si vous souhaitez qu'elles disparaissent plus vite, au début, aérez plus souvent et essuyez les meubles avec un chi on légèrement imbibé d'eau mélangée avec un peu de vinaigre.
- Conservez bien cette notice.

## •Instructions de soin pour les meubles lessivés/huilés en bois naturel

La surface de votre nouveau meuble est traitée avec de l'huile purement biologique. Pour conserver le brillant de ce meuble lessivé/huilé, nous recommandons de faire un traitement occasionnel avec de l'huile à meuble. Comme le type de traitement de surface peut éventuellement laisser des résidus d'huile naturelle, nous vous recommandons de frotter le meuble avec un chi on non pelucheux. Après l'utilisation, laissez sécher le chi on et ensuite le jeter.

## Instructions de soin pour les meubles naturels/peints en bois naturel

La surface se nettoie de préférence avec un chi on légèrement humide.

**Attention :** Les détergent agressifs ou à teneur en solvant ou les produits de polissage ne doivent pas être utilisés.

## Consignes de soin pour les meubles avec des plaques en dérivé du bois

Pour l'entretien de votre meuble en plaques en dérivé du bois, utilisez de préférence un chi on doux non pelucheux ou une peau de chamois. Essuyez la surface légèrement humide.

**En règle générale :** Veuillez n'utiliser en aucun cas les détergents suivants :

- **Chiffons à microfibrilles** ou **gomme à saleté**. Ils contiennent souvent de fines particules abrasives qui peuvent rayer les surfaces ;
- **substances chimiques agressives** ainsi que **des détergents abrasifs**. Ceux-ci peuvent également endommager les surfaces ;
- **poudre à récurer, paille de fer** ou **éponge grattant**. Elles détruisent la surface si profondément qu'il n'est plus possible de la retraiter ;
- **aspirateur**. Les buses et les brosses peuvent rayer la surface ;
- **nettoyeur à vapeur**. De fait de la haute pression et de la chaleur avec lesquelles la vapeur d'eau sort sur la surface, elles peuvent être endommagées et même décoller la base.

#### Dragi clien i,

Vă mulțumim pentru comanda dvs.! Indiferent dacă ați achiziționat o piesă de mobilier confecționată din lemn natural, o fațetă cu luciu intens sau o fațetă mată din material plastic – fiecare piesă de mobilier are caracteristici complete speciale. Atât natura cât și structura lemnului, cum ar fi de exemplu micile noduri la mobila din lemn natural, constituie parte a specificului individual pentru fiecare piesă de mobilier. Deoarece mobila din lemn natural este expusă variațiilor persistente de climă și umiditate, la nivelul suprafeței pot să apară modificări sporadice, cum ar fi de exemplu microtrăsuri sau modificări ale culorii. De regulă, în decursul timpului se reduce strălucirea, iar saturația culorii crește – lemnul se închide la culoare. Modificările menționate reprezintă un proces normal în cazul materialelor naturale, precum lemnul. Această broșură vă oferă câteva sfaturi pentru întreținerea mobilierului dvs., astfel încât să vă bucurați de el timp îndelungat.

#### Reguli general valabile:

- Nu așezați pe mobilier obiecte fierbinți.
- Nu amplasați lumânări direct pe mobilier.
- Tergeți imediat lichidele vărsate.
- Verificați la intervale regulate poziția fermei a uruburilor și a feroneriei.
- Mirosul tipic, aromatic al mobilierului din lemn natural reprezintă întotdeauna o garanție a calității.
- Locurile de culoare deschise de la noduri apar printr-o igrăie naturală a răsini la suprafață și pot fi lustruite cu o cârpă uscată, care nu lasă scame.
- În cazul altor materiale din lemn, piele, lăcuire sau tapiete persiste în mod inevitabil la început un miros propriu. Acest mirosuri dispar în timp de la sine. Dacă doriți să contribuiți la acest lucru, aerisiți și mai des la început și/sau tergeți mobila cu puțin apă și oțet.
- Purtați aceste instrucțiuni în condiții optime.

#### Indicații pentru întreținerea mobilierului din lemn natural tratat cu leu/impregnat cu ulei

Suprafața noului dvs. mobilier este tratată cu ulei biologic pur. Pentru a menține acest luciu natural, tratat cu leu/impregnat cu ulei, vă recomandăm să aplicați din când în când un tratament ulterior cu ulei adecvat pentru mobilier. Deoarece modul de tratare a suprafeței poate să lase eventuale reziduuri de ulei natural, vă recomandăm să frecăți mobila cu o cârpă care nu lasă scame. După utilizare lăsați cârpa să se usuce, apoi îndepărtați și impuritățile.

#### Indicații pentru întreținerea mobilierului din lemn natural netratat/lăcuit

Suprafața se curăță în mod optim cu o cârpă uscată sau umedă.  
**Atenție:** A nu se utiliza detergenți sau substanțe de lustruit corosive sau care conțin solvenți.

#### Indicații pentru întreținerea mobilierului din materiale fibrolemnoase

Pentru întreținerea mobilierului din materiale fibrolemnoase, vă recomandăm să utilizați în mod optim o cârpă moale care nu lasă scame sau o bucată de piele tăbăcită de ters. Tergeți suprafața cu puțin apă.

**Reguli general valabile:** Vă rugăm să nu utilizați în niciun caz următoarele substanțe sau mijloace de curățare:
