Key press
- key functions: unit conversion switch
  Program to load switch

How to weight
1. Remove the insulation film, put the scale on a hard & flat surface (avoid carpet of soft surface),wait. 2 seconds before weighing.
2. Set up unit prior to use, unit can not be converted when weight.
3. Stand on the scale in balance, you can read the result automatically when the weight is set after 3 seconds and automatically switch off after 8 seconds.

Note: Before putting the scale in the flat & hard surface, the scale is automatically switch off, you must weight automatically first.

ADVICE FOR USE AND CARE
- When unused the scale should be left unloaded to avoid over assumption of power and failure of work.
- Try to stand in the middle place to avoid slip.
- Stand on the scale in good balance to avoid failure of lock and incorrect illustration.
- No heavy knock in the scale.
- Keep the scale dry. Do not use it in areas with water stains. Do not rinse with water.
- Handle with care, when using.
